1. For questions where candidates must write their answers, do not award the mark if the answer is incomplete, or if there is additional information that is irrelevant or shifts the focus of the answer. However, accept other words with the same meaning as the correct answers in the markscheme.
2. Accept spelling and grammatical mistakes provided they do not change the meaning of the answer.
3. For questions where candidates choose an answer from options, if two answers are given – one in the box and one outside – only mark the answer inside the box.
4. Words inside brackets in this markscheme are optional: candidates may include these words in their answer, but they are not essential for the mark to be awarded. If there is more than one possible answer to a question, these answers are indicated by a slash (/).
5. This markscheme must be read in conjunction with the Marking Instructions for the relevant component on IBIS.

1. En ce qui concerne les questions pour lesquelles les candidats doivent rédiger leurs réponses, n'attribuez pas le point si la réponse est incomplète, ou s'il y a des informations supplémentaires qui ne sont pas pertinentes ou qui modifient l'objet de la réponse attendue. Néanmoins, l'utilisation de mots ayant le même sens que les bonnes réponses est acceptée dans le barème de notation.
2. Les erreurs d'orthographe et de grammaire sont acceptées si elles ne changent pas le sens de la réponse.
3. En ce qui concerne les questions pour lesquelles les candidats doivent choisir une réponse parmi plusieurs propositions, s'ils ont donné deux réponses différentes, l'une à l'intérieur de la case et l'autre en-dehors, ne prenez en compte que la réponse qui se situe dans la case.
4. Les mots entre parenthèses dans ce barème de notation sont facultatifs : les candidats peuvent les inclure dans leur réponse, mais ils ne sont pas essentiels pour justifier l'attribution du point. S'il y a plus d'une réponse possible à une question, celles-ci sont indiquées par une barre oblique (/).
5. Ce barème de notation est à lire parallèlement aux instructions de notation disponibles sur IBIS pour la composante concernée.

1. En las preguntas en las que los alumnos deban responder por escrito, no otorgue la puntuación si la respuesta está incompleta, o si aportan detalles adicionales que cambian el enfoque o no son pertinentes. No obstante, acepte otras palabras con el mismo significado que las respuestas correctas en el esquema de calificación.
2. Acepte los errores de ortografía y gramática, siempre y cuando no modifiquen el significado de la respuesta.
3. En las preguntas en las que los alumnos deban elegir una opción, si se han escrito dos respuestas (una dentro de la casilla y la otra fuera), puntúe únicamente la que esté dentro de la casilla.
4. Las palabras entre corchetes en este esquema de calificación son opcionales: los alumnos pueden incluirlas en la respuesta, pero no son fundamentales para que se otorgue la puntuación. Si hay más de una respuesta posible a una pregunta, esto se indica con una barra (/).
5. Este esquema de calificación debe leerse junto con las instrucciones para la corrección del componente en cuestión disponibles en IBIS.

Question		Target answer	Accept	Do not accept	Marks
6.		A, B, C, F, H	In any order. 1 mark for each correct answer.		5
7.		(the) military	• (attending) training in (the) military / military training • (starting) in/at (the) military	• training military • military school • (attending) flight school • training regimen	1
8.		(undergo a rigorous) medical exam(s)	• medical (test(s)) • rigirious/regiros/rigrous medical exam(s)	• regular medical exam • having/building up/accumulated/enough flight hours (in the military or as a private pilot)	1
9.		(strong) reasoning skill(s)	• (strong) reasoning ability • (strong) reasoning	• “skill(s)” without “reasoning” • strong thinking skills • strong reasonal skills	1
10.		patient	• patience • Minor misspellings that do not obscure or change meaning (e.g. pacient / paciont / paitient / pasient)	• composed • patient and composed/calm • remain patient • Misspellings that alter or obscure meaning (e.g. passion / pation)	1
11.		record	Other words with same meaning, e.g. “write”, “write down”.	• process • select • register • collect • calculate	1
					Total
					10

Text C

Question		Target answer	Accept	Do not accept	Marks
12.		survival mechanism(s)	- surviving/survive mechanism - Minor misspellings that do not obscure or change meaning (e.g. survaival mecanisms)	- fight or flight response - survival skill(s) - injury - dopamine - Misspellings that alter or obscure meaning (e.g. survivable mechanisms)	1
13.		sensation(s)	of sensation(s)	- response sensations (makes us more) responsive (to) sensations - feelings - senses	1
14.		(ever) riskier behaviour	- risky/risk/(more) dangerous behaviour(s) - people (can) push themselves to (ever) riskier/risky behaviour - people (can) push themselves to risk	- the/this behaviour - risk of injury - athletes pushing risky behaviours / push people/us to (have) more risky behaviour(s) - other risky behaviour - behaviour risk “risk” without “behaviour” - The addition of “caused by high dopamine levels/adrenaline” or similar wording to the target answer	1
15.	a	skill(s) development	- In either order. - Other words with same meaning, e.g. “development of skills”, “develop (their) skills”, “skills upgrade”, “skills developing” “desire of prestige”, “desire(d) prestige”. - prestigious	- skilling development “skill(s)” without “development”	1
	b	(desire for) prestige		- desirable/desireful prestige - excitement - new experiences - meeting people - self-awareness	1

Text A

You are going to hear a conversation between a salesperson and a customer about buying a phone.

Salesperson	OK, who is my next customer?
Customer	Oh, that's me. I'm looking for a phone.
Salesperson	What are you in the market for? We mainly carry refurbished goods, but we also have new devices.
Customer	Well, before buying my current phone, I read that refurbished phones were as good as new ones, but I'm not sure I agree now.
Salesperson	In my opinion, they're often as good as new. Of course, other factors can also affect the quality, like whether it's certified or how it's been maintained. However, refurbished phones are a lot less expensive than a new device.
Customer	Well, I bought this phone refurbished to save money, as you said. But now I plan to buy a new phone because I think it will last longer.
Salesperson	That's not been my experience; but new phones have other advantages. However, if you are buying a new phone, we'd like to encourage you to recycle your old phone because technology products create e-waste.
Customer	E-waste? What's that?
Salesperson	Electronic waste. It's now one of the most talked-about environmental issues worldwide. Any discarded electrical item can be considered e-waste, but here we focus on technology and devices.
Customer	So, do you recycle devices here?
Salesperson	Not here at the shop; we lack the equipment. But we do collect devices for recycling, for a small fee. It's not cheap to recycle devices so we cover our costs as we all feel it's essential to protect the environment.
Customer	That's okay – it's important that we all do our part.
Salesperson	Great, let's look at some phones over here then.
Customer	You know, I've never really thought about e-waste before.
Salesperson	Believe it or not, there are more mobile phones than people on the planet.
Customer	Really?
Salesperson	Look at this diagram on the wall. This is the 'waste hierarchy' which ranks the preferred order for five actions to manage waste, including e-waste. At the top, the most environmentally-friendly option is prevention. This means that there's less creation of waste. If people use items longer, for example, fewer phones would need to be manufactured. Reduction is the next best option, followed by recycling. Then, recovery of waste is the fourth stage before disposal, which means that items end up in a landfill. That's the worst option for the environment.

Customer	So recycling is important then.
Salesperson	Yes. Unfortunately, only fifteen to twenty percent of e-waste is recycled. And, tech products are made with precious metals and minerals. When these end up in a landfill, they pollute the soil. Not only that, once they're gone, mining is increased to dig up more of them, which is also bad for the environment.
Customer	Well, I'll definitely recycle my phone.
Salesperson	Great. Now let's look at these phone options.

Text B

You are going to hear a presentation for Career Day, about becoming a pilot.

Pilot	Hi everyone. It's great to be here at your school for Career Day. As your teacher stated, I'm a pilot, and I've been flying for an international airline for 5 years. However, I started out 15 years ago for a domestic airline, after a lot of training. So, let's begin today's talk with what typically happens. I usually work 4 to 5 consecutive days, before having 2 days off. But during peak times like summer or holidays, it's only compulsory to have 1 day free from work in 7, for safety. I work from New York City so I might fly to London the first day and then on to Singapore or Tokyo the next. Pilots bid for different flight routes each month, so it rarely becomes routine. It all sounds exciting, doesn't it? If it's an international flight, which generally has a longer layover, the airline always puts me up in a well-appointed hotel. On one recent trip, I actually had 3 days in Italy, which was nearly as good as a vacation! However, it's not always like that. After an international flight, it's only obligatory to have 14 hours to rest, so it's only a few times a month that I get to spend 24 hours in a city. I exploit my opportunities for travel though! I make a point of visiting at least one museum or historical spot on every trip and I try local food, although many of my colleagues are tired of tourism. I suppose I do have to contend with jetlag. Many pilots grow accustomed to flying back and forth across various time zones, but I need to uphold a routine for sufficient sleep. Some of our airplanes hold 300 passengers, which is a great deal of responsibility, so it's imperative to feel my best. So, let me share a slide with you, demonstrating the primary requirements to become a pilot.

Pilot	The training and certification vary based on a pilot's country of residence, but in general pilots need to undergo a considerable training regimen before they can fly for a living. Attending flight school for a Private Pilot License is one way to get training, but did you know that most pilots start out training in the military? Now, a Private Pilot license allows you to fly, but not for employment. For that, you need a Commercial Pilot License. This means in addition to knowing how to fly and building up flight hours in the military or as a private pilot, you need to undergo a rigorous medical exam, and of course demonstrate you have the requisite knowledge to be a commercial pilot. Once hired, pilots start on smaller planes, before moving to larger planes for overseas work. But that's not all. Pilots need to be natural leaders with strong reasoning skills and ability with numbers. Of course, being proficient with computers is required, but because there's such an essential focus on keeping everyone safe, it's also necessary to remain patient and composed in stressful situations! And finally, the ability to pay attention to detail is really imperative – as a pilot, you often have to record a lot of data, and it must be accurate! Most importantly, safety is always paramount! So, if that sounds interesting, I'm happy to stay after class and answer questions.

Text C

You are going to hear a radio programme interview with Professor Brown about extreme sports.

Interviewer	Welcome to the programme, Professor Brown. I've read that adrenaline is the key to the exponential growth of extreme sports. Is that true?
Prof. Brown	People often think extreme sports is about the adrenaline rush but there are actually several types of motivation for engaging in these sports. Let's start with adrenaline, though. Adrenaline is a hormone that enables survival mechanisms to be activated in the body when someone is faced with danger or stress, thus ultimately protecting us.
Interviewer	Hmm, why would someone intentionally seek out that 'fight or flight' response you mention, if it's meant to protect us from harm?
Prof. Brown	Well, adrenaline increases the heart rate, causing oxygen to circulate through the body more rapidly. This in turn makes us more responsive to sensations. Dopamine is also released in the brain during extreme sports. This powerful chemical is closely linked to feelings of pleasure and reward. The body can grow accustomed to higher levels of these chemicals, though, so people can push themselves to ever riskier behavior. This behavior, in fact, is one of the potentially negative effects of participating in extreme sports.
Interviewer	Along with the inherent risk of injury, I suppose. You mentioned other motivating factors though. What are those?
Prof. Brown	Studies show that motivation varies based on how long someone has participated in extreme sports. Factors like excitement, new experiences and meeting people are most important in the early stages. However, skills development becomes a motivator at the middle stage. Athletes can also be driven by desire for prestige at this level, while at a high level, motivation becomes more internal and includes self-awareness, and the need to feel in control.
Interviewer	Sorry to interrupt Professor. It's time for a commercial break.

Interviewer	Welcome back. Let's return to that last point you were making, professor, about the need to feel in control. Isn't that ironic, to want to feel 'in control' in extreme sports?
Prof. Brown	Well, as athletes become more experienced, part of the challenge is to master uncertain situations. However, friendship remains an important driving force, regardless of experience. There's an immense amount of trust needed due to the inherent danger of these sports – that creates strong bonds.
Interviewer	Wow! There's a lot of intrinsic motivation, isn't there? I never realized the rationale behind taking part in extreme sports was so sophisticated.
Prof. Brown	Yes. However, another impetus for extreme sports could be considered more external. Athletes delight in sharing videos of themselves engaging in extreme sports across various online platforms. The purpose of these is to entertain and inform others, but on rare occasions, they might attract possible sponsors. Extreme sports is a growing business and companies want to get in on the action. In the future, I anticipate people might also be interested in coaching others as a career.

Interviewer	I've watched some of those videos – they're incredible. I watched a few BASE jumpers, in fact, in preparation for this interview.
Prof. Brown	Yes, that's actually one of the fastest-growing extreme sports now, followed by surfing. The latter is one of the extreme sports that debuted in the 2021 Olympics, as did skateboarding. Now, some people disagree with the inclusion of these sports as they consider traditional sports to be more representative of skill and athleticism. They believe the Olympic committee is trying to attract younger viewers, but I think it's fair to say that these are sports that require great skill and precision, and should be included.
Interviewer	Thank you for your insights today, Professor. We'll be back next week with another fascinating topic.
